PLENARY INDULGENCE—The faithful may obtain a plenary indulgence—a remission before God of the temporal punishment for a previously forgiven sin—by visiting a minor basilica. To obtain a plenary indulgence during a pilgrimage to a basilica, one must participate in any sacred rite or recite the Lord's Prayer or the profession of faith while there, then go to Confession and Communion, and pray for the intention of the pope. ~ taken from *The Register*, Salina Diocese newspaper

A Little Chuckle

A small town had three churches: Presbyterian, Methodist, and Catholic. All three had a serious problem with squirrels in the church buildings and each, in its own fashion, had a meeting to deal with the problem.

The Presbyterians decided that it was predestined that squirrels be in the church and that they would just have to live with them.

The Methodists decided they should deal with the squirrels lovingly in the style of Charles Wesley. They humanely trapped them and released them in a park at the edge of town. Within 3 days, they were all back in the church.

The Catholics had the best solution. They baptized and confirmed the squirrels. Now they only see them at Christmas and Easter.

HELP US PRESERVE THE INTEGRITY OF OUR CHURCH

The exterior of our beloved church is in need of repair. This restoration project will help preserve the structure and beauty of our church for generations to come.

Mid-Continental Restoration Co., Inc. will be completing this work. The scope of the project includes:

Sealant Application to Vertical Joints in Stone Caps & Bands
All vertical head joints between coping stones and stone bands will be cut back and cleaned of any loose or foreign debris. These joints will then be resealed with new sealant, tooled to a neat and uniform appearance, and color-matched as closely as possible to the existing material.

Tuckpointing Stone Mortar Joints
All mortar joints will be carefully inspected. Any that are found to be void, open, or defective will be repaired. All affected areas will be cleaned to remove any loose residue, and defective joints will be repointed using a non-staining, non-shrinking Type "N" masonry mortar. This mortar will be color-matched and tooled to blend seamlessly with the surrounding joints.
